D.W. MORGAN LAUNCHES THREE NEW LOCAL TRUCKING OPERATIONS IN HONG KONG, SHANGHAI AND LAEM CHABANG, THAILAND

Expanded presence in Asia supports Morgan's goal to provide on-the-ground services in key manufacturing centers worldwide

PLEASANTON, Calif., February 12, 2010 — The D.W. Morgan Company has expanded operations in Hong Kong, Shanghai and Laem Chabang, Thailand, to provide critical last-mile coordination to its high-tech manufacturing clients. The new local trucking services, along with customs, warehousing and other logistics capabilities, ensure that clients get the same high standards for execution worldwide.

"It's relatively easy to put goods on a plane or a ship and send them to Asia," said David W. Morgan, Founder and CEO of D.W. Morgan Company. "When they arrive at the destination, however, standards for security, handling and inventory visibility rapidly erode. At Morgan, our vision is to put our own resources in each remote location, so that customers get the exact, same experience everywhere and every time."

Laem Chabang, Thailand, is an important Southeast Asian manufacturing center and the country's largest seaport. Morgan's own dedicated trucks now link port warehouses with nearby factories and provide a link to Bangkok and international destinations.

Morgan's Hong Kong trucking operations support movement of goods in and out of the port of Hong Kong—one of the world's busiest hubs for air and sea transportation. They also provide cross-border service to mainland manufacturing centers in Shenzhen, China, home to the world's largest factory, a Foxconn facility. And, they form a base for longer overland routes to such industrial cities as Xiamen, Chongqing, Chendu and Shanghai.

Last, in Shanghai, Morgan's dedicated trucking rounds out a suite of services that includes spare parts warehousing, vendor-managed inventory warehousing, value-added resale, import / export and freight forwarding.

In each location, Morgan uses all-new equipment, which meets the highest standards for reliability and environmental concerns. Morgan also uses a single, global GPS technology and its proprietary ChainLing Mobile iPhone application for field staff. The result is that clients can see and manage operations, as they happen, online. A U.S.-based customer service and operations management team makes sure that standard operating processes are followed throughout all Morgan offices.

The new capabilities complement Morgan's other full-service operations centers in Penang, Malaysia; Houston, Dallas and Austin, Tex.; Atlanta; San Jose, Calif.; Guadalajara, Mex.; Philadelphia; and Tampa, Fla. Morgan serves more than 85 additional countries through its status as a longtime member of the World Cargo Alliance, the world's largest independent forwarding network.

About D.W. Morgan Company

D.W. Morgan Company helps the world's top manufacturers provide Supply On Demand® for their clients. By combining transportation management and logistics services with a flow of coordinated, real-time information and strategic consulting, Morgan dramatically improves efficiency and reduces costs—while maximizing flexibility.

Since 1990, Morgan has served a Who's Who of leading businesses, including Cisco Systems, Ericsson,

Calix and Applied Biosystems. Morgan has received numerous industry awards and has twice been named Cisco Systems Supplier of the Year. Morgan is certified as a Corporate Plus™ minority-owned business by the National Minority Supplier Development Council.
